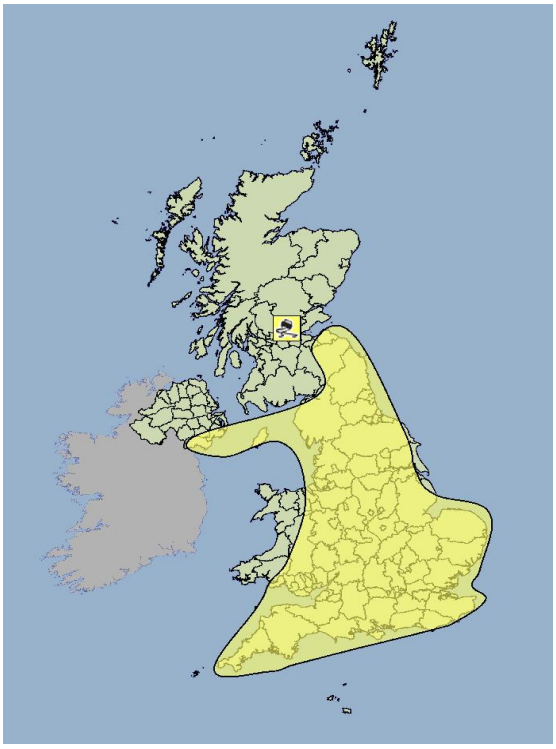
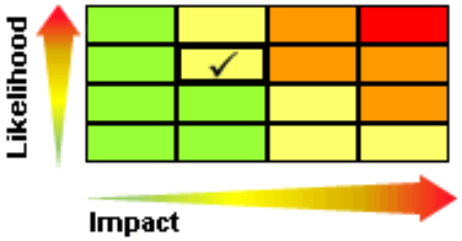
National Severe Weather Warning Service





Chief Forecasters Assessment
After a very cold day on Sunday, temperatures are likely to fall well below freezing across much of the area into the start of Monday. This will lead to any partly melted snow refreezing. Any remaining sleet and snow in the extreme southwest will clear overnight whilst some wintry showers may continue to affect east coasts, falling onto subzero surfaces.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Mon, 19th Mar 2018** until **10:00 on Mon, 19th Mar 2018**

Ice is likely widely on roads, pavements and cycle paths. This increases the risk of accidents, as well as injuries due to falls.

This warning has been updated to remove much of Scotland (apart from the southeast) and parts of Northern Ireland whilst it has been extended to cover remaining parts of eastern England and the extreme southwest.
